Responsibility of the Company

- Under the limitations of section 2, when service is interrupted the credit allowance will be computed on the following basis.
 - No credit shall be allowed for an interruption of less than two hours.
 - The Customer shall be credited for an interruption of two hours or major fraction thereof that the interruption continues.
 - Where there has been an outage, and a minimum usage charge applies, and the Customer fails to meet the minimum usage, a credit shall be applied against that minimum. The credit shall equal 1/360th of the monthly minimum charges associated with the portion of service disabled for each period of two hours or major fraction thereof that the interruption continues.

Cancellation of Credit

- Where the Company cancels a service or the provision of equipment and the final service period is less than the monthly billing period, a credit will be issued for any amounts billed in advance, prorated at 1/30th of the monthly recurring charge for each day the service was rendered or the equipment was provided. This credit will be issued to the Customer or applied against the balance remaining on the Customer's account.

Disconnection of Service by the Company

- Upon ten (10) days written notice, the Company may discontinue service or cancel an application for service without incurring any liability for any of the following reasons:
 - Non-payment of any sum due to the Company for service for more than thirty days beyond the date of rendition of the bill for such service;
 - Violation of any regulation governing the service under this document;
 - Violation of any law, rule, or regulation of a government authority having jurisdiction over the service; or

- When the established expiration date of the Debit Account is reached.

Fractional Charges

- Charges for a fractional part of a month (which follows a full month) are calculated by counting the number of days remaining in the billing period after service is furnished or has been discontinued. The number of days remaining in the billing period are counted starting with the day after the service was furnished or discontinued. Divide that figure by thirty days. The resultant fraction is then multiplied by the monthly charge to arrive at the fractional monthly charge.

Insufficient Fund Checks

- Customers will be charged \$25.00 on all checks issued to the Company which are returned due to insufficient funds. At the discretion of the Company, the insufficient funds check charge may be waived under appropriate circumstances (e.g. a bank error).

Taxes and Fees

- For Debit Cards, state and local taxes are included in the stated rates in this document. The prepaid calling card service rate does not include state and local taxes which are required to be paid at the point of sale. The stated rate does include federal, state and local taxes, which are required to be paid on usage of the underlying telecommunications service when that service originates and terminates within a particular jurisdiction. The total consumed cost for each call, which includes the applicable non-point of sale taxes, is deducted from the remaining balance on the Customer's debit card account. For all other calls, state and local taxes (i.e., gross receipts tax, sales tax, municipal utilities tax) are listed as separate line items on the Customer's bill and are not included in the quoted rates and charges set forth in this document.
- All federal, state and local taxes (e.g., gross receipts tax, sales tax, municipal utilities tax) are not included in the rates under this agreement, but shall be listed as separate line items on the Customer's bill.
- To the extent that a municipality, other political subdivision or local agency of government, or commission imposes and collects from the Company a gross receipts tax, occupation tax, license tax, permit fee, franchise fee, or regulatory fee, such taxes and fees shall, as allowed by law, be billed pro rata to the Customer receiving service from the Company within the territorial limits of such municipality, other political subdivision or local agency of government.

- Service shall not be subject to taxes for a given taxing jurisdiction if the Customer provides the Company with written verification, acceptable to the Company and to the relevant taxing jurisdiction, that the Customer has been granted a tax exemption.
- The Company may adjust its rates or impose additional rates on its Customer to recover amounts it is required by governmental or quasi-governmental authorities to collect from or pay to others. The Company may also adjust its rates or impose additional rates to cover the administrative cost of collecting such charges or paying compensation to other entities. Examples of such programs include, but are not limited to, the Universal Service Fund (USF), the Presubscribed Interexchange Carrier Charge (PICC), and compensation to pay telephone service providers for the use of their pay telephones to access the Company's services.

SECTION 3-DESCRIPTION OF SERVICES

Timing of Calls

- The Customer's monthly usage charges for the Company service are based upon the total number of minutes the Customer uses and the service options to which the Customer subscribes. Chargeable time begins when the connection is established between the calling station and the called station or PBX. Chargeable time ends when either party hangs up. If the called station hangs up but the calling party does not, chargeable time ends when the connection is released by automatic timing equipment within the telecommunications network.
- No charges apply if a call is not completed.

Holiday Rate Periods

- The following are Company recognized National Holidays determined at the location of the calling station. For purposes of this agreement, recognized holidays are New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. The evening rate will apply to calls made on Company recognized holidays unless a lower rate normally would apply. When a call begins in one rate period and ends in another, the rate in effect when the call begins applies. In the event that a minute is split between rate periods, the rate in effect at the start of that minute applies.

Start of Billing

- For billing purposes, the start of the service is the day following acceptance by the Customer of the Company's service or equipment. The end of service date is the last day of the minimum notification of cancellation or any portion of the last day, after receipt by the Company of notification of cancellation as described in Section 2 of his agreement.

Interconnection

- Service furnished by the Company may be interconnected with services or facilities of other authorized communications common carriers and with private systems, subject to the technical limitations established by the Company. Service furnished by the Company is not part of a joint undertaking with such other carriers. Any special interface equipment of the Company and other participating carriers shall be provided at the Customer's expense. Interconnection with the facilities or services of other carriers shall be under the applicable terms and conditions of other carriers' tariffs. The Customer is responsible for taking all necessary legal steps for interconnecting its Customer-provided terminal equipment or communications

systems with the Company's. The Customer shall secure all licenses, permits, right-of-ways, and other arrangements necessary for such interconnection.

Terminal Equipment

- The Company's service may be used with or terminated in Customer provided terminal equipment or Customer provided communication systems, such as teleprinter, handsets, or data sets. Such terminal equipment shall be furnished and maintained at the expense of the Customer, except as otherwise provided. The Customer is responsible for all costs at its premises, including Customer personnel, wiring, electrical power, and the like incurred in its use of the Company's service. The Customer shall ensure that its terminal facilities are of the proper mode, bandwidth, power, data, speed, and signal level for the intended use of the Customer, and that the signals do not damage the Company's equipment, injure personnel or degrade service to other Customers. If the Customer fails to maintain and operate its terminal equipment properly, resulting in the occurrence or possibility of harm to the Company's equipment or personnel, or impairment to the quality of service to other Customers, the Company may, upon written notice, require the use of protective equipment at the Customer's expense. If this fails to produce satisfactory quality and safety of service, the Company may, upon written notice, terminate the Customer's service.

Calculation of Distance

- Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call. The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate center and associated vertical and horizontal coordinates that are currently being used within the industry.

Formula:
$$\frac{\sqrt{(v_1-v_2)^2 + (h_1 - h_2)^2}}{10}$$

Minimum Call Completion Rate

- The Customer can expect a call completion rate of 99% per 100 calls attempted during peak use periods for all Feature Group D (1+) services. The Company will engineer its switching systems on the basis that ninety-nine percent (99%) of the Customers accessing their system will be served during the busy hour.

Special Service Arrangements

- Special Service Arrangement charges will be based on the estimated cost of furnishing such services including the cost of operating and maintaining such a service, the cost of equipment and materials used in providing such a service, the cost of installation including engineering, labor supervision, transportation, and the cost of any other specific item associated with the particular Special Service Arrangement request.

SECTION 4 - RATES AND CHARGES

Universal Service Fund (USF) Fee

- The Company will assess all Customers a Universal Service Fund Fee which recovers the Company's contributions to federal programs which support universal service in high cost areas and low income users of telecommunications and assist schools, libraries and rural health care facilities to obtain telecommunications and information services. Universal Service Subsidy fees are subject to periodic adjustment.

Directory Assistance

- A directory assistance charge applies per call for telephone numbers, area codes, and/or general information requested from the Directory Assistance operator. Customers may receive up to two numbers per request. No call allowance applies. The charge applies whether or not the operator furnishes the number(s), area code(s), or other information.

Pay Telephone (Payphone) Surcharge

- A surcharge shall be assessed for each call made from a pay telephone using the Company's long distance service, when the pay telephone provider is not otherwise compensated for the use of the instrument. Residential and Small Business Direct Dial Service

- Residential and small business direct dial service is an outbound calling service designed for use from standard Customer-provided switched access lines.
